Distinction

RESEARCH EXPERIENCE

**Practical Application of Momentum Strategy in the Futures Market
(Suzhou Financial Intelligence Technology Co., Ltd.)**

Supervisor: Xuanyang Yin

2022.6-2022.8

Description: Code Showcase

- Conducted research on futures product strategies, specifically testing momentum strategies on the Chinese financial platform - Myquant.
- Implemented a robust approach by sorting monthly returns of all futures products.
- Developed opening conditions: selecting winning and losing portfolios, initiating long positions in the winning portfolios, and short positions in the losing portfolios.
- Implemented risk control measures by monitoring the portfolios in real-time within a month. If a winning(loser) portfolios falls below(rises above) the moving average (9-day MA), promptly replaced them with the top-ranked(bottom-ranked) futures products.

**High-Frequency Data Processing
(XJTLU)**

Supervisor: Dr. Yi Hong

2021.6-2022.6

Description: Code Showcase

- Designed and constructed high-frequency data warehouse in SQL for derivative securities market in China;
- Strategy studies of securities product (stocks, futures and options) trading based on high-frequency data;
- Conducted empirical studies confirming the existence of a contrarian effect in Chinese futures markets during the bull market, and the presence of a momentum effect during the period of the COVID-19 pandemic;
- Sharpened practical skills in using high-frequency data for capital allocation, strategy development and risk management;
- Examined the profit of the momentum strategies over the pandemic, which obtains a Sharpe ratio of 5.

INTERNSHIPS

Bohai Bank
